

ANNUAL REPORT

OF THE

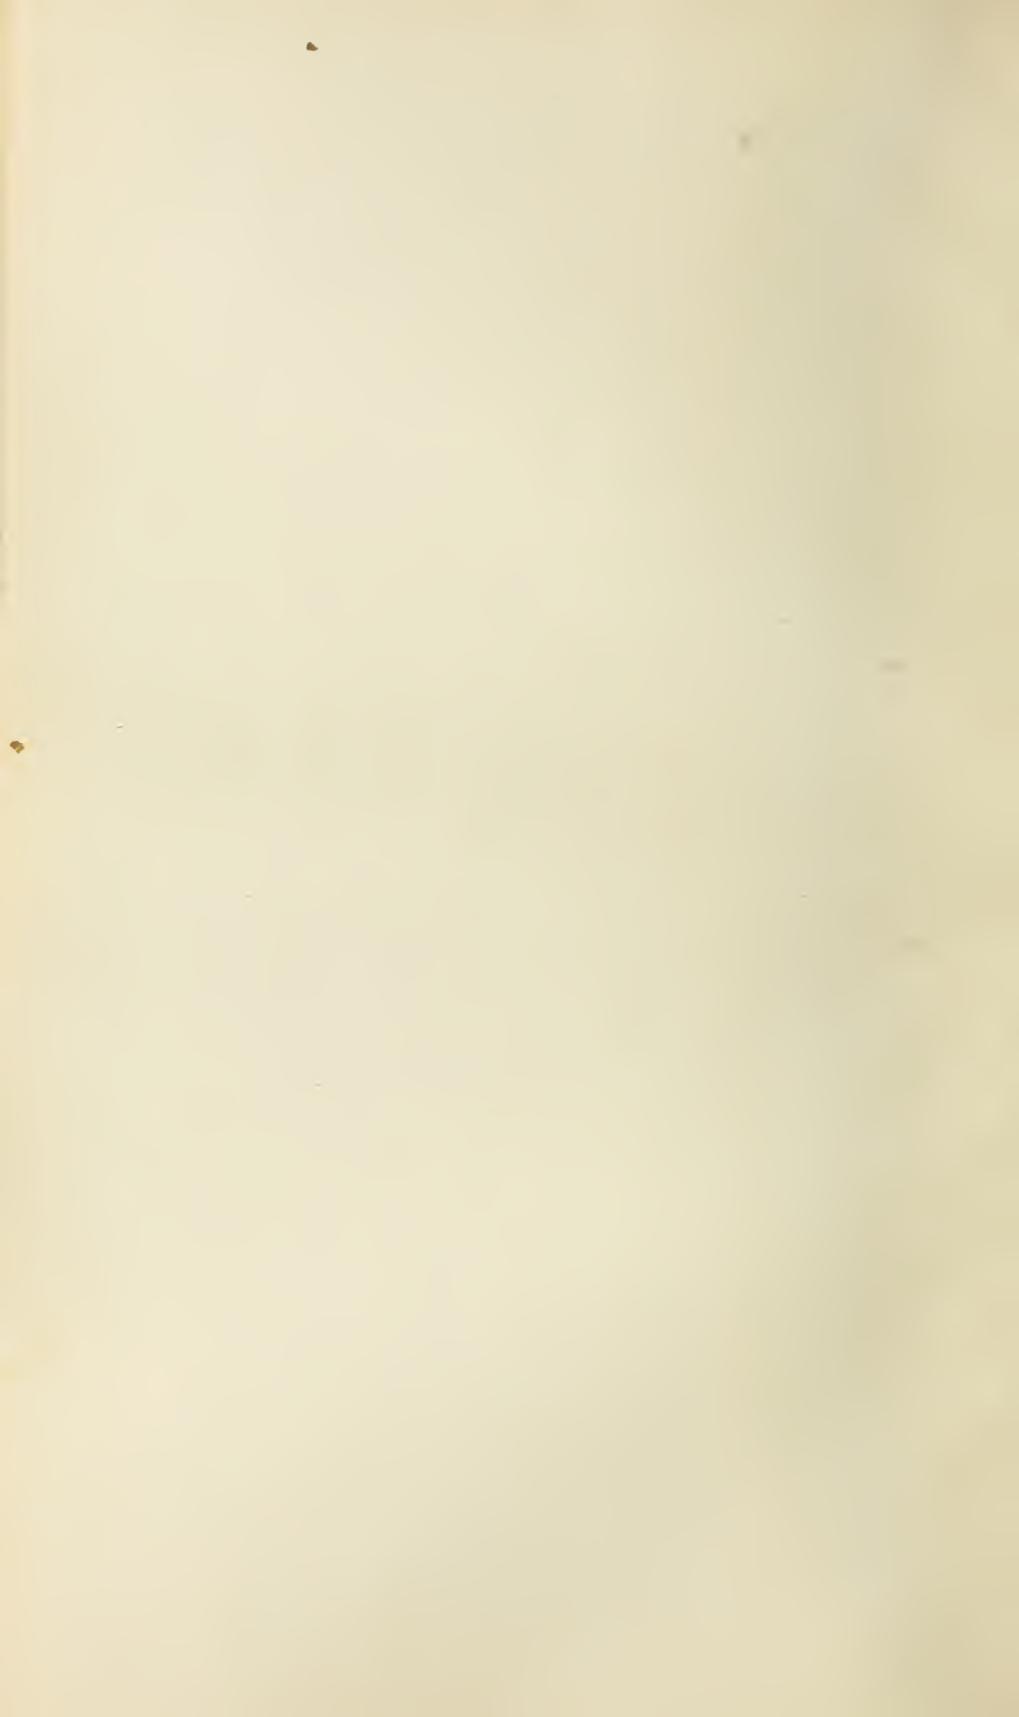

PUBLIC PRINTER

FOR THE

FISCAL YEAR ENDED JUNE 30, 1900.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1900.

GOVERNMENT PRINTING OFFICE,
OFFICE OF THE PUBLIC PRINTER,
Washington, D. C., December 3, 1900.

SIR: I have the honor to transmit herewith the annual report of the operations of the Government Printing Office for the fiscal year ended June 30, 1900.

Very respectfully,

F. W. PALMER,
Public Printer.

The PRESIDENT OF THE SENATE PRO TEMPORE.

ANNUAL REPORT
OF
THE PUBLIC PRINTER.

To the Senate and House of Representatives:

During the past year, while the facilities of this office have been taxed to their utmost capacity to meet the ever-increasing demands made upon it by the two Houses of Congress and the several Departments of the Government, there have been no delays in the execution of the work which have embarrassed the public service in any degree.

In the item of printing Senate and House bills and resolutions alone, the number printed during the first session of the present Congress was only 367 less than that printed during the three sessions of the Fifty-fifth Congress, while the Senate and House committee reports of the Fifty-fifth Congress exceeded those of the first session of the Fifty-sixth Congress by 578 only. The following statement shows the increase in the number of volumes of reserved Senate and House documents and reports printed during the Congresses named:

Fifty-fourth Congress:	Volumes.
First session	120
Second session	94
	<hr/> <hr/> <hr/> 214

Fifty-fifth Congress:	Volumes.
First session	31
Second session	133
Third session	116
	<hr/> <hr/> <hr/> 280

Fifty-sixth Congress, first session	Volumes.
	185

The subjoined statement exhibits the increase in the number of volumes constituting the annual reports of some of the Executive Departments for the fiscal years named.

Report of the Secretary of the Interior:	Volumes.
For 1897	11
For 1898	12
For 1899	15
For 1900	15

Report of the Secretary of War:	Volumes.
For 1897.....	8
For 1898.....	9
For 1899.....	13
For 1900.....	22
Report of the Secretary of the Navy:	
For 1897.....	1
For 1898.....	2
For 1899.....	1
For 1900.....	1

Volume 30 of the Statutes at Large (Fifty-fifth Congress) contained 1,000 pages more than volume 29 (Fifty-fourth Congress), the former having 2,070 pages and the latter 1,070 pages.

On May 8, 1900, a letter was received by me from Herbert Putnam, Librarian of Congress, requesting the establishment in the Library building of a branch of the Government Printing Office wherein the printing and the binding for the Library might be executed. As a basis for this request, the Librarian stated that there were books under his charge which could be spared only for a minimum time; that there were others needing full binding, which, on account of their value or otherwise, should not be taken from the building for that purpose; that, as a whole, library binding is of a character more special than the bulk of work done at the Government bindery. The Librarian assumed that the convenience of having the binding done in the Library building would extend also to the printing. Under authority of law conferred upon the Public Printer materials for a branch printing office and bindery were purchased and placed in the Library building, and the branch is now in active operation.

On the 12th of January, 1895, an act of Congress was passed which contained a provision authorizing the payment of 50 cents per hour, or \$4 per day, to pressmen employed in the Government Printing Office. During many preceding years the compensation to that class of employees had been 40 cents an hour, or \$3.20 per day. Inasmuch as the rates of compensation to other skilled mechanics in this office had remained without corresponding increase, efforts were made from time to time to secure action in their behalf. During the last session of the Fifty-fifth Congress authority was conferred upon the Public Printer to pay, in his discretion, compositors and bookbinders in the Government Printing Office 50 cents an hour, or \$4 per day, the same rate received by pressmen. In the exercise of this discretion, I authorized the payment to the two classes of skilled mechanics thus designated the sum of 50 cents per hour, or \$4 per day.

Applications were subsequently made by other classes of skilled mechanics for a similar rate of increase of wages, and, under authority conferred upon the Public Printer by law, the following-named classes were authorized to receive the same rate of compensation paid to press-

men, compositors, and bookbinders, viz: Blacksmiths, carpenters, electricians, electrotypers, leather parers, machinists, plumbers, saw grinders, steam fitters, and stereotypers. The pay of painters was increased from \$3.20 per day to \$3.50 per day. Female operatives were authorized to receive an increase as follows: Directresses from \$2.24 to \$2.50 per day, gold workers, numberers, press feeders, and sewers from \$1.92 to \$2 per day, folders from \$1.83 to \$2 per day. These several rates of increased compensation to the classes named were authorized to take effect on July 1, 1900.

The stable at present occupied for the uses of the Government Printing Office, on G street between North Capitol street and First street east, is leased property, at a rental of \$2,600 a year. It was constructed for the special occupancy of the Government Printing Office, but the building is not fireproof, and the rental is liable to terminate at the option of the owner at the end of each year. In view of these facts, I respectfully recommend the construction of a fireproof building for the uses of a stable as near as possible to the fireproof extension of the Government Printing Office, now in course of erection. For this purpose three lots of 24 feet frontage on G street, extending 175 feet to Jackson alley, immediately contiguous to the new extension, would be available as a site for such a building, ownership and possession to be obtained by condemnation proceedings. Two of the lots only would be necessary for the purposes of the building, but the third should be acquired to comply with the wise provision in every statute passed by Congress for the construction of public buildings, viz, that they "shall be unexposed to danger from fire by an open space of at least forty feet on each side, including streets and alleys."

During the past year the equipment in the power plant of this office has maintained its record for efficiency and economy, no expenditures having been made for repairs either to the engine or boilers.

In order to meet the increased demands which will be made upon this plant when the new building for the Government Printing Office shall have been completed, a contract has been made with the Edward P. Allis Company, of Milwaukee, Wis., for two 800-horsepower cross compound condensing engines, each engine to be provided with a direct connected 600-kilowatt electric generator. The generators to be direct current, self-exciting, compound, multipolar, and containing all the latest improvements known to electrical science for this class of machinery. The price for these two engines and generators, erected in position, exclusive of steam and electric connections, is \$73,500. They will be ready for service in August, 1901.

Contracts have also been awarded to the I. P. Morris Company, of Philadelphia, Pa., for four 300-horsepower Scotch type marine boilers, with economizers and a specially constructed steam main; to James H. McGill, of Washington, D. C., for four steel supports for economizers,

and to Henry R. Worthington, of Brooklyn, N. Y., for eight steam pumps. Drawings for the new electric switchboard are nearly completed. This board, inclusive of the one now in use, will be 80 feet long and 9 feet high. In connection with the electric plant for the new building, a large storage battery will be installed, which will be used as a regulator as well as to operate the plant on small loads.

The economizer supports have been erected and four of the steam pumps are in place. Two of the boilers and the steam main are ready for installation.

When the addition, now in course of erection, to the present power plant shall have been completed, the engine room will occupy a space measuring 63 by 130 feet.

Submitted herewith is the report of the Superintendent of Documents; a statement by Lieut. John S. Sewell, of the Engineer Bureau of the War Department, showing the present condition of construction upon the Government Printing Office extension, and tabular statements exhibiting the amount of work executed and disbursements made during the fiscal year ended June 30, 1900.

F. W. PALMER,
Public Printer.

REPORT OF THE SUPERINTENDENT OF DOCUMENTS.

SALES.

There were sold during the fiscal year 27,903 documents. The total amount received was \$9,978.61, of which \$953.65 was returned to the remitters because the office was unable to supply the documents ordered. The net receipts were therefore \$8,902.21, being an increase over the previous year of \$1,346.11. The average price per document was 31.9 cents as against 31.3 cents in 1899.

The public demand for public documents has been stimulated largely by the distribution of price lists. This office has issued the third edition of a price list of all public documents now available for sale. The Department of Agriculture issues and distributes a monthly list of its publications, which has a circulation of about 60,000 copies. Under the provisions of section 61 of the printing act, all of the priced publications of the Department of Agriculture are turned over to this office for sale, and these include substantially everything issued by that Department except Farmers' Bulletins.

The monthly list, as stated, is placed in the hands of 60,000 people, and all applications for priced documents are referred to this office. The number of such documents supplied for sale averages 200 copies of each edition, and it is not unusual for me to receive in two or three days a sufficient number of orders to exhaust the supply. The Department recently issued Entomology Bulletin 25, new series, on the Mosquito; price 5 cents. The supply was exhausted in a day or two, and orders for it are coming in at the rate of 10 to 20 a day. The consequent correspondence, return of money, etc., is a greater expense than it would be to reprint the document.

But the constant demand for documents that are out of print is not confined to the publications of the Department of Agriculture. There should, in my judgment, be authority lodged somewhere to order the reprint of documents when the public demand is large enough to justify it, if the plates have not been destroyed. My experience in this respect led to the insertion of a clause in the bill now pending before Congress (S. 3181) to amend the printing act, to authorize the Superintendent of Documents to make requisition upon the Public Printer for the reprint of documents in certain cases.

Authority to reprint would obviate the supposed necessity of limiting the sale of documents to individuals. The printing act prohibits the sale of more than one copy of any document to the same person. This restriction is the cause of much annoyance and vexatious delays to business men throughout the country, while it

really affords no protection to the Government against anyone who may choose to take the trouble to evade it.

Until recently it was almost impossible for the public to obtain public documents, as they were distributed by way of favor to a few people. The demand was limited because no catalogues were issued and the people did not know what was being published. Now catalogues and price lists are printed at great expense to the Government, and are circulated all over the country, so that the people have become greatly interested in and are eager to buy documents. Sound business principles would suggest that means be afforded this office for supplying any document the people want and are willing to pay for, without restrictions of any kind.

EXCHANGES WITH LIBRARIES.

On account of the numerous independent agencies by which documents are distributed, large numbers of duplicates accumulate in some of the libraries of the country, while others are able to obtain documents only in a fragmentary way, if at all. The requisitions of the latter for documents to fill up gaps in their files led the Superintendent of Documents to ask that duplicates not needed be sent him for redistribution, frank labels and mail bags being supplied to the libraries for the purpose.

The superintendent of documents, Department of the Interior (Dr. John G. Ames), in his report for 1894-95 estimated the number of volumes received from all sources since he undertook "this clearing-house service in the interest of the libraries" at 225,000, of which 24,500 were Congressional Globes and Records.

I do not find any statistics concerning the redistribution to libraries prior to the establishment of this office. The record since then shows as follows:

Documents received from and redistributed to libraries.

Year.	Received.	Redistributed.
	Volumes.	Volumes.
1895	2,590
1896	31,321	65,823
1897	17,848	7,414
1898	32,261	51,998
1899	25,410	196,983
1900	29,805	92,717
Previously received by Dr. Ames	139,215 225,000	414,935
Total	364,215	414,935

It thus appears that nearly half a million volumes of documents have been rescued from ultimate destruction and placed in the files of libraries that can use them to advantage.

This exchange system does not mean that a library may establish a credit account by returning documents against which it may draw in the future. If such was ever the practice, it has been discontinued. Under the present rule all libraries, so far as their need for documents is concerned, are placed on an equal footing, and their requisitions are honored from the available exchange surplus without regard to the number of duplicates they may have individually returned. It appears to me that this is the just and practical method. Any other plan would involve a large amount of bookkeeping, and no library could obtain surplus documents unless it had a credit account.

The demand for surplus documents to fill up deficiencies in sets now comes largely from libraries not regular depositories, as the depositories have substantially

filled up the gaps in their files of public documents, at least so far as this office can aid them, and their needs require.

I find that there is a constantly increasing inquiry for the public documents from public institutions, school and college libraries, especially for such as relate to scientific matters. This demand must sooner or later result in a more economic and systematic distribution of the documents printed for the personal use of heads of departments and bureaus, and members of Congress.

In order to properly dispose of our surplus stock, I have from time to time made up lists of documents available for distribution, so that librarians might make a selection. A number of these lists have been supplied to each member of Congress, so as to insure an equal distribution to the Congressional districts. This plan has produced very satisfactory results and will be enlarged upon in the future.

DOCUMENTS RESERVED FOR BINDING UPON ORDERS FROM THE VICE-PRESIDENT,
SENATORS, AND REPRESENTATIVES.

The discussion of the proper disposal of surplus documents leads to the consideration of the question: What shall be done with the documents reserved for binding upon orders from the Vice-President, Senators, and Representatives?

Section 54 of the printing act approved January 12, 1895, provides that 500 copies of each document and report shall be reserved in unstitched form for binding upon orders from members and officers of the Senate and House; that if not called for and delivered within two years after printing, shall be delivered in unbound form to the Superintendent of Documents for distribution.

According to a statement made to me by the foreman of the folding room, Government Printing Office, but 97 copies of the documents of the Fifty-fourth Congress were called for by those entitled to have them bound. There remain, then, 403 copies of each document of that Congress to be turned over to this office in unbound form for distribution, making in the aggregate 85,000 volumes of books. These are all stored in the warehouse, at great expense to the Government, without any prospect of this office being able to dispose of them in their present form.

I can see but one solution of the problem, and that is for Congress to authorize the Public Printer to bind the entire surplus arising from this source in good cloth binding so that the documents may be distributed to school, college, and public libraries. This suggestion is embodied in the bill now before Congress, heretofore referred to.

DESIGNATED DEPOSITORYES.

The term "designated depositories" is given to institutions named by Senators, Representatives, and Delegates in Congress, under sections 501 and 502, Revised Statutes of the United States. Each Senator, Representative, and Delegate is entitled under the provisions of those sections to name one library in his State, District, or Territory, respectively, as a depository of public documents. At first the distribution to these depositories consisted solely of Congressional documents. The law has been amended from time to time, however, so that now substantially all publications of the Government are distributed to them.

In addition to the depositories designated by members of Congress, there are a number designated by law, with equal privileges. These are the libraries of each State and Territory, the libraries of the eight Executive Departments, the libraries of the Military Academy at West Point and Naval Academy at Annapolis, respectively, the American Antiquarian Society, Worcester, Mass., and the library of the secretary of the Territory of Alaska. Total authorized depositories, 510. While the depository list is subject to expansion by increased representation in the House after a census, provision is made for the printing and binding of but 500 copies of each document.

Heretofore there has been no difficulty, because of the large number of members who failed to make designations. So many new designations have been made recently, however, that I shall soon be compelled to decline to make additions to the list because of lack of documents.

The Public Printer should be authorized to print and bind as many copies of each document as may be required for distribution to depository libraries, the exact number to be certified to him at the beginning of each Congress.

In another part of this report may be found a list of all depository libraries on the books of this office, by States, alphabetically arranged, and showing the Congressional district to which each is charged.

As the law now stands, a member of Congress may change the depository charged to him each session of Congress if he chooses to do so. Fortunately this is seldom done, as most members recognize the fact that broken sets of books are of little value, and that a library once named as a depository ought to remain so permanently. A change in the law that will insure permanency is, however, desirable.

Librarians have not been slow to recognize improved methods in the Printing Office, which have already resulted in the gain of one year in the distribution of Congressional documents. This very satisfactory condition has been brought about by the establishment of a new section in the bindery for binding Congressional documents "reserved" for binding and distribution to designated depositaries. It is my expectation that substantially all the documents of the Fifty-fifth Congress will be distributed before the Fifty-sixth Congress shall meet at its second session, and that considerable progress will have been made in the binding and distribution of the documents of the first session of the Fifty-sixth Congress.

The distribution to the depositories during the year was much larger than ever before, amounting to 217,562 books and pamphlets, of which 110,000 were sheep-bound volumes. This is an average of 443 books to each depository.

GEOLOGICAL DEPOSITORIES.

These depositories are entitled to receive all the scientific publications of the Geological Survey, except the annual reports. Designations are made under the provisions of section 79 of the printing act approved January 12, 1895. Two designations may be made by each Senator, Representative, and Delegate in Congress. A list of these depositories, showing the Congressional district to which charged, may be found in another part of this report.

REMAINDER DEPOSITORIES.

The distribution of documents to this class of depositories is authorized by section 68 of the printing act approved January 12, 1895. No more than three libraries may be designated by any Senator, Representative, or Delegate in Congress to receive "remainders." A list of libraries now on the list of remainder depositories, showing the Congressional district to which charged, may be found in another part of this report.

There was an average distribution during the fiscal year of thirty-five books and pamphlets to each of these depositories.

MONTHLY CATALOGUE.

The law authorizes the printing of but 2,000 copies of the Monthly Catalogue. These are distributed as follows: Five hundred copies to members and officers of Congress; 500 copies to designated depositories, as required by law; 200 copies to heads of Departments and other officials of the Government, and the remainder to miscellaneous libraries and public institutions.

The pressure for the catalogue upon the part of individuals has been very great, and many were anxious to pay any reasonable subscription for it. To satisfy this

demand, in a measure, I have prepared and had printed a complete price list of all documents available for sale, which is supplied free to anybody. But this is not satisfactory to the large business and scientific interests of the country who desire to keep posted on current publications. I therefore hope that Congress will authorize the publication of a subscription edition of the Monthly Catalogue, to be sold at 60 cents a year.

REFERENCE LIBRARY.

The following table shows the number of books and maps in the library June 30, 1900, the number of publications of each Government author, and the number of accessions during the year.

The great mass of scientific and historical treasures locked up in these documents for lack of proper indexes will, it is hoped, soon be opened up to the people by means of the new check list, which is being pushed to completion as rapidly as possible.

There is a growing need for a national library of official public documents, and there is no better foundation upon which to build such a library than the library of this office. There is not much doubt but that the State and municipal and foreign governments would render every assistance in their power to make the collection of official documents complete.

This office would undertake the collection of the official documents of State, municipal, and foreign governments if authorized by Congress to do so. If such authority were given, however, it would be necessary also to afford proper facilities for the use of the same by the public. Sufficient space could probably be arranged for either in the new Printing Office building or in the proposed Hall of Records.

No doubt Congress will soon see the necessity of providing means for opening up to the public the great document library we now have. At present there is barely room for the clerical force, and I have been compelled to refuse all applications to use it.

PUBLICATIONS.

The following documents were published during the year:

One Consolidated Index (Fifty-fifth Congress, third session), 1 price list of all documents available for sale by this office, and 11 numbers of the Monthly Catalogue of Public Documents.

Forty-eight thousand cards were written in the preparation of documents published and to be published hereafter.

In my last annual report I spoke of improving the Monthly Catalogue by making the index cumulative. The change was made at the beginning of the present calendar year with the February number. The June and December numbers will, therefore, contain complete indexes to the five preceding numbers. The cumulation will be for a period of six months only, as I find that it is not practicable to cover the whole year without a break. It is my present intention to consolidate the index for the whole year in the December number.

PROPOSED AMENDMENT TO THE PRINTING ACT.

A bill was introduced in the Senate at its last session to amend the act of January 12, 1895, relating to the public printing, binding, and the distribution of public documents. The Committee on Printing reported the bill back with the recommendation that it pass.

It is hoped that prompt and favorable action will be taken at the next session of Congress, as a change in the present law is essential to economy in printing, binding, and the prompt distribution of documents.

The librarians of the country are substantially unanimous in their approval of the proposed amendments, especially in so far as they relate to changes in methods of binding and titles of public documents.

NEW CHECK LIST.

Cards have been written for the Congressional set of documents, and are now being compared and arranged for printing. This part of the check list, with index to same, will probably be published in separate form for temporary use, as there will be considerable delay in finishing the list and index of the departmental service.

Very respectfully,

Hon. F. W. PALMER, *Public Printer.*

FIELD WORK.

The steel frame is nearly all in place as high as the third floor; the masonry of the basement story is nearly finished, as is also the underground sewerage work.

A good beginning has been made on the fireproof construction.

The entire work is about two months behind, owing to delay on the part of the steel contractors, the worst feature due to this being the impossibility of finishing the power-house extension within a reasonable time and before the new boilers begin to arrive.

The building will probably be finished before the close of the fiscal year 1902, and within the authorized limit of cost. It will probably be practically closed in by July 1, 1901, or soon thereafter.

JOHN STEPHEN SEWELL,
First Lieutenant, Corps of Engineers.
